

DE-ODORASE™ FARM PAK

PRODUCT INFORMATION

INDICATIONS

For use with stock feed to aid in the control of odours associated with intensive livestock production.

COMPOSITION

FARM PAK: 36 g / kg *Yucca shidigera* extract as a free-flowing powder.

Carrier: Prebase™

DIRECTIONS

CATTLE

Add 1 kg DE-ODORASE™ FARM PAK to each tonne of feed, to be fed continuously. The inclusion level may be reduced to 500 g / tonne once odour control is achieved (usually 4 to 8 weeks).

For initial treatment of manure pits DE-ODORASE™ CONCENTRATE should be added directly to the pit in accordance with the directions for use on the DE-ODORASE™ CONCENTRATE pack.

PIGS

Starter: Add 1 kg DE-ODORASE™ FARM PAK to each tonne of feed, to be fed continuously.

Grower and Breeder: Add 1 kg DE-ODORASE™ FARM PAK to each tonne of feed, to be fed continuously. The inclusion level may be reduced to 500 g / tonne once odour control is achieved (usually 4 to 8 weeks).

POULTRY, SHEEP & GOATS

Add 500 g DE-ODORASE™ FARM PAK to each tonne of feed, to be fed continuously.

DISCUSSION

DE-ODORASE is composed of long chain polysaccharides possessing abundant chemical binding sites, which physically bond to odorous compounds including ammonia, hydrogen sulphide, skatoles and indoles. When complexed to the large DE-ODORASE molecules, these undesirable odour-producing compounds cannot enter the atmosphere where they can cause harm and nuisance.

DE-ODORASE™ is produced from an extract of *Yucca shidigera*, a plant found in the deserts of America and Mexico. The final product is a standardised and premixed presentation formulated to provide convenient addition rates for on farm use.

WITHHOLDING PERIOD

Nil

SCHEDULE

Exempt

STORAGE

Store below 30°C (Room Temperature). Protect from moisture.

EXPIRY AFTER MANUFACTURE

2 years (optional)

PACK SIZES

1 x 25 kg
