Feather Meal

Indications

Feather Meal is a major by-product of the slaughter industry and is an important ingredient for the diets of pigs and poultry.

Composition

Typical analysis

Crude Protein (minimum)	75%
Ash (maximum)	4%
Crude fat (maximum)	8%
Crude fibre (maximum)	3%
Moisture minimum 4% to maximum 10%	

Directions for use

Can be included in the diets of Pigs, Poultry and Horses. Please consult your animal nutritionist to determine correct diet ratios.

Discussion

Feather meal is produced by cooking the feathers from slaughtered poultry at 140 degrees C and a pressure of 200kpa for 30 minutes to hydrolyse the keratin protein. The cooked product is then ground and dried to produce the meal.

Storage

Store in a cool dry place.

Expiry after Manufacture

6 months

Pack Sizes

1000 kg bags
