DIRECTIONS

Thoroughly mix **10 kg of FELINE™ MILLPACK PREMIX** per 1 tonne of complete feed. To ensure even dispersion of the premix in the total ration it is recommended that each kg of premix be first blended with 4 kg of feed. This

blend should then be added to the mixer after the concentrates and before high moisture products and then thoroughly mixed.

NOTE: To improve the stability of this premix, **Choline Chloride** has not been added. It is recommended that Choline Chloride be added to the feed at a rate recommended by a nutritionist.

DISCUSSION

FELINE™ MILLPACK PREMIX is a high quality vitamin and mineral premix for supplementation of cat diets. FELINE™ MILLPACK PREMIX contains fat-soluble vitamins A, D₃ and E and these will assist with general health, productivity and aid in the prevention of stress-related disorders associated with deficiencies of vitamin and minerals in the growing cats or kittens.
