

BEC Feed Solutions - Internal Specification

Material code 166300

Material name RUMENSIN 200 S4

Last updated 6/04/2006

Specification approved by: Jana Prasek

Composition: 20% Monensin Sodium

Product Solubility Not Soluble

Pack size 25kg bags

Inspection Plan Inspect the packaging for damage or tampering. Verify the seals, if applicable. Visually inspect freshly taken sample, look for uniformity of product, compare with digital photo if needed.

If a non-conformance occurs, notify Regulatory Affairs Manager.

Shelf Life 2 Years

Sample Retention 5 Years

Special Notes HAS TO BE APVMA REGISTERED MATERIAL. THIS PRODUCT IS SCHEDULE 4 - PRESCRIPTION VETERINARY MEDICINE

Store below room temperature and in a dry place.
Rumensin improves the efficiency of ruminant digestion by shifting the ratio of volatile fatty acids from being produced in the rumen. More propionic acid and less acetic and butyric acids are produced during rumen fermentation resulting in more energy available from the feed consumed. Hence feed efficiency is improved.
